FULL STACK WEB DEVELOPER

Full stack web developer experienced in Ruby, Javascript, Ruby on Rails and React/Redux based programming, eager to learn new programming languages, and with a background in the medical device industry. Demonstrated strong skills in leadership and project building that help launch an app used by an entire endoscopy sales force.

TECHNICAL SKILLS

Languages: Ruby, Javascript, SQL, HTML, CSS **Technologies:** Ruby on Rails, Sinatra, React, Redux

TECHNICAL PROJECTS

Lead Tracker CMS - [Github-api](#) | [Github-client](#) | [Demo](#)

Custom Content Management System (CMS) project built with React and Rails API

- Applied Redux and Redux-Thunk to properly maintain the state while making asynchronous fetch request
- Implemented client-side routing by using React-Router for accurate RESTful routing
- Leveraged Rails sessions and cookies to properly log the user in and out of the CMS application.
- Utilized Material UI to create an engaging display of user data.

The Vegan Cow - [Github](#) | [Demo](#)

Recipe Content Management System (CMS) built with a vanilla Javascript frontend and a Rails API backend

- Integrated Javascript and Rails to implement features that reached across frontend and backend
- Leveraged AJAX calls to establish client-server communication
- Encapsulated related data and behavior by utilizing Object Oriented Javascript

Project Manager - [Github](#) | [Live Demo](#)

A project management system for developers to create and keep track of the progress built with Ruby on Rails

- Leveraged Active Record associations to build a powerful and scalable application
- Applied MVC best practices to assure a robust development environment and performance
- Deployed Ominauth to handle user authentication safely through Google.
- Implemented partials to minimize repeat code and keep code base DRY
